

Project Geologist

Exciting Opportunity at Maple Gold Mines

Maple Gold Mines Ltd. is seeking a Project Geologist to support exploration programs on its Québec gold projects, including major drilling programs, geophysical and geochemical surveys, geological interpretation, data compilation, and 3D modelling. This role is well suited to a practical exploration geologist with approximately 5 to 10 years of experience who enjoys field-based work and contributing to the advancement of gold exploration projects.

About Maple Gold Mines

Maple Gold Mines is a Canadian exploration company advancing a district-scale gold project portfolio in Québec's prolific Abitibi Greenstone Belt through disciplined technical work, data integration, and discovery-focused exploration.

Reporting to the Vice President, Exploration, the successful candidate will work with the exploration team to plan and execute field programs, manage and interpret drilling data, maintain strong QA/QC practices, and contribute to geological modelling and technical reporting. The position will involve working on rotation (14/14) at site and may require a flexible schedule depending on program needs.

Key Responsibilities

- Support the planning, execution, and management of exploration programs, including diamond drilling campaigns, geophysical and geochemical surveys, and related field activities.
- Coordinate exploration contractors, ensure the integrity of geological data, interpret results, and contribute to target generation.
- Maintain and improve geological models using Leapfrog and other relevant 3D software.
- Maintain QA/QC standards and support accurate, timely technical reporting.
- Work safely and collaboratively with field crews, contractors, consultants, and the broader technical team.

Qualifications

- Bachelor's degree in geology or geological engineering.
- Approximately 5 to 10 years of exploration experience.
- Experience with diamond drilling programs, including core logging, sampling, QA/QC, and drill data interpretation.
- Strong working knowledge of 3D geological software, including Leapfrog, as well as GIS and common geoscience tools.
- Ability to work effectively in field and office environments, communicate clearly, and contribute to a collaborative technical team.

- Fluency in French is required.
- **Assets:** Experience in gold exploration; membership with the Ordre des géologues du Québec (OGQ), or eligibility and willingness to become a member; fluency in English; and experience with mineral resource support, target generation, or advanced exploration projects.

Why Join Maple Gold Mines?

- Opportunity to join a focused exploration team advancing gold projects in Québec, with room to grow technically and contribute directly to active field programs.
- Work with an experienced exploration team in one of Canada's most prolific gold belts.
- Competitive remuneration, benefits, professional development, and growth opportunities.

Application Details

- **Title:** Project Geologist
- **Project:** Douay-Joutel
- **Location:** Québec, Canada
- **Status:** Full-time
- **Application Deadline:** Applications will be reviewed on a rolling basis, and we intend to select a candidate as soon as possible.
- **Start Date:** The successful candidate is expected to start as soon as possible.

Please submit your cover letter and resume directly to Maple Gold Mines at **careers@maplegoldmines.com**. Applications submitted through LinkedIn may not be considered. We thank all applicants; only those selected for an interview will be contacted.
